

How to Work Around DLM2000 ASCII Record Length Limit

Yokogawa Corporation of America

Barry Bolling

barry.bolling@us.yokogawa.com

When saving a record length longer than 1.25 Mpts as an ASCII / .CSV file format; the following error will appear on-screen:

Work Around to Save Large ASCII Files When Using the DLM2000:

1. Enable Compression (Choose: **P-P** or DECIM).
2. Reduce the Record Length to 1.25 Mpts or less, and re-acquire the waveform data.
3. Use Xviewer as a work around:
 - a. Save the waveform in binary .WDF format
 - b. Move the data file to a PC
 - c. Open the binary .WDF file using Xviewer
 - d. Perform a 'Save As' choosing ASCII (.CSV)
 - e. If you have multiple .WDF files to convert, perform the following steps:
 - i. Open Xviewer
 - ii. Click on TOOL
 - iii. Choose "CSV Multiple Files Conversion..."
